Into the forest

It may be a short drive from the party town of Patong but it feels like a whole new world – that’s the sense you get stepping into the Keemala Phuket. Fringed by lush rainforests, waterfalls and streams, this resort, a member of the Small Luxury Hotels of the World, takes glamping to a

whole new level with its uber-luxe climate-controlled clay cottages, tents, tree houses and spa huts inspired by four ancient settler tribes that called Phuket home. For those who need to regain balance in their lives, the resort also offers four wellness packages centred on the themes of purification, unwinding, energising, and rejuvenation – highlights include stress management sessions, hot stone massages and spa cuisine meals. keemala.com

LOST
NO
MORE

Did you know that some three million pieces of luggage are reported lost around the world every year? With the GeoTrakr, Samsonite helps yours from being added to that statistic. Dubbed the “world’s first web-connected” luggage, all the bags in the series come with a pre-equipped LugLoc locating device, which lets users track the location of their luggage on their smartphone. Owners are entitled to 30 free traces for the first year, after which they can subscribe to a monthly membership if they want to keep using the service. samsonite.com
